

Test Report

No. 5480840-CH01-SD

Date: August 13, 2026

Page 1 of 3

RUSTIC STRENGTH LLC
403 North Oak Avenue,
Mansfield, MO 65704
United States

The following sample(s) was/were submitted
and identified by/on behalf of the client as:

Sample Description: Laundry Detergent, Lotion
Style No.: Not Provided

Sample Received Date:

07/29/2026

Testing Period:

07/29/2026-08/13/2026

Test Requested : Please refer to the result summary.

Test Method & Results : Please refer to next page(s).

Result Summary :

Test(s) Requested	Conclusion
1. Total Fluorine	See Test Results

Signed for and on behalf of SGS North America,
Inc.

Prepared By:

Jesse Hackett
Sr. Chemist, Chemistry Laboratory

Natasha Torres
Technical Report Writer, Softlines Laboratory

This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 45 days only."

1. Total Fluorine

Test Method: With reference to BS EN 14582:2016 – Analysis was performed by Ion Chromatography.

Test Item(s):	Result (mg/kg)		Reporting Limit (mg/kg)
	1	2	
Fluorine (F)	ND	ND	20

Sample Description:

1. Laundry Detergent
2. Lotion

Note: 1. ppm = parts per million
2. mg/kg = ppm
3. 1% = 10000 ppm (mg/kg)
4. ND = Not Detected, reported when the reading is less than the reporting limit value.

Remark: In case positive results(s) is/are obtained, it cannot be determined whether fluorine content comes from organic and/or inorganic sources. Further test of individual PFASs is recommended to verify the actual PFAS substances concentration in the tested sample(s).

Decision Rule: When statement of conformity is made, unless the decision rule was mentioned in above specified test items, the decision rule would be based on the non-binary statement with guard band (is equal to the expanded measurement uncertainty with a 95% coverage probability, $w = U95$) in ILAC-G8:09/2019 Clause 4.2.3.

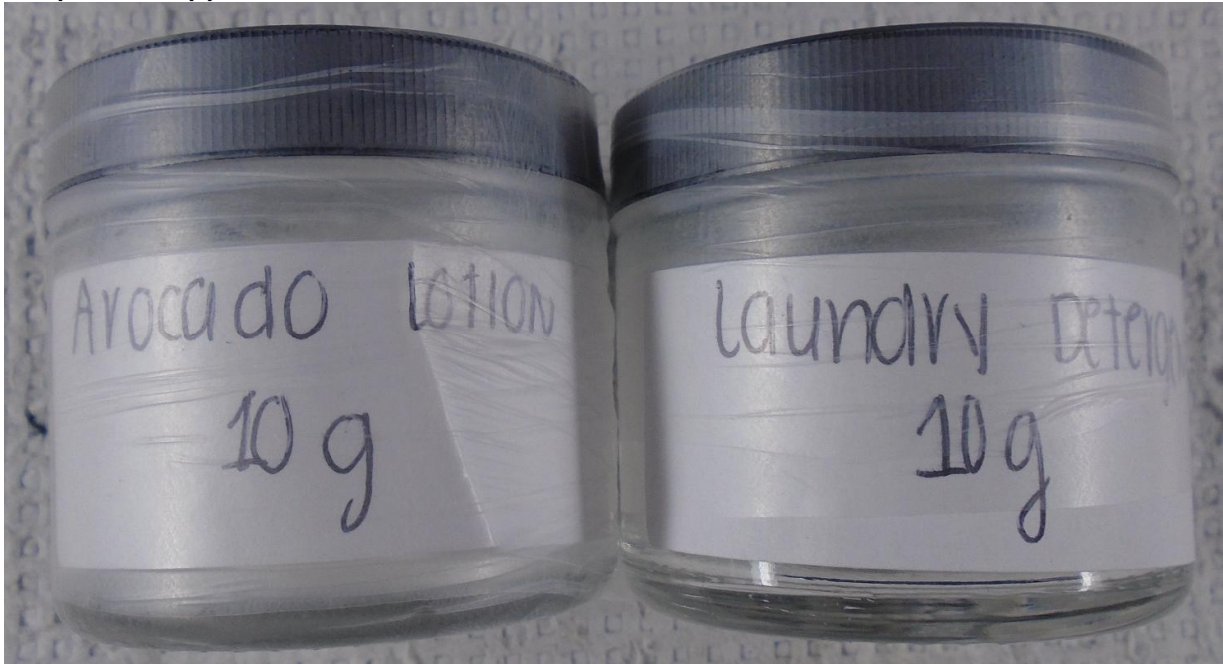

"Pass - the measured value is within (or below / above) the acceptance limit, where the acceptance limit is below / above to the guard band." or "Pass - The measured values were observed in tolerance at the points tested. The specific false accept risk is up to 2.5%."

"Fail - the measured value is out of (or below / above) the tolerance limit added / subtracted to the guard band." or "Fail - One or more measured values were observed out of tolerance at the points tested." The specific false reject risk is up to 2.5%."

"Guarded Pass if the result is within the uncertainty passing band close to the specification."

"Guarded Fail if the result is within the uncertainty failing band close to the specification."
